d9namite3@gmail.com

22/1 Village no.10,Banglen,  
Banglen,Nakornpathom

### About Me

Motivated Cybersecurity enthusiast with a strong background in Java and C programming. I have a deep understanding of data privacy (PDPA) and logical problem-solving. I am eager to apply my technical skills and attention to detail to protect company data and assist in threat detection as a Junior Analyst.

### Education

- Kasetsart University

Bachelor of Science in Computer Science

- U-Thong Industrial and Community Education College

Electronic Engineering

### Language Skills

- Thai
- English

## Work experience

### 2022 - Present

#### Junior IT Security Assistant

- Checked company documents to make sure they followed PDPA privacy laws.
- Managed how personal data was collected, stored, and deleted securely.
- Created simple reports for managers about data safety and privacy risks.

### 2020 - 2022

#### Software Tester (Intern)

- Code Analysis: Used Java and C to review software for logic errors and bugs.
- Debugging: Worked with developers to fix vulnerabilities that could lead to system crashes.
- Documentation: Created simple reports on software performance and security "holes."

## Skills

- **Programming:** Java, C, and Arduino (C++)
- **Security & Privacy:** Data Privacy (PDPA), Data Life Cycle management.
- **Logic & Math:** Logical reasoning, Statistics, and Linear Algebra (useful for data analysis).
- **Systems:** Basic hardware knowledge and BIOS configuration
- **Fast Learner:** Proven ability to learn new software, mods, and technical tools quickly.
- **Problem-Solving:** Strong ability to debug code and find logical errors.

Dear Hiring Manager,

I am writing to apply for the Cybersecurity Analyst position. I believe my experience can help your team succeed.

As you can see from my attached resume, I have hands-on experience as a Junior IT Security Assistant. I have worked on data privacy (PDPA) and fixing code errors using Java and C. I am a quick learner and very flexible, which allows me to adapt to new tools and solve problems fast.

I am confident that my skills will be useful to your company. Thank you for your time and consideration.

Sincerely,

Thanaphat Maneechot
